Email subject	Next Wave go/no-go - Aureon evidence automation and AI workflow platform
Status	Draft attachment pack. No email has been sent.

Email Draft

Subject	Next Wave go/no-go - Aureon evidence automation and AI workflow platform
---------	--

Hello,

I am reviewing whether Aureon should be positioned for Innovate UK's Next Wave: Breakthrough Wave 1 competition.

Aureon is a local-first AI evidence automation and workflow platform. The possible angle is Createch-aligned AI workflow tooling: evidence capture, review gates, traceable automation, and operator handoff.

The fit is conditional. We should only proceed if we can frame the project as credible Createch or industrial research rather than a generic business automation tool.

Please review the attached go/no-go summary and advise whether the Createch framing is strong enough before we invest in a full application.

Regards,

Gary Leckey
Director, R&A Consulting and Brokerage Services Ltd

Go/No-Go Summary

- Deadline tracked in the war room: 2026-08-11 at 11:00 UK time.
- Potential fit exists if Aureon is framed as evidence-led AI workflow and Createch/industrial research tooling.
- Weak fit if framed only as ordinary automation, internal productivity tooling, or trading infrastructure.

Conditions For Proceeding

- One clear project package selected.
- Createch or industrial research angle is defensible.
- Compliance issue is cleared or explanation is ready.
- Evidence pack includes repo summary, validation plan, technical risk, and commercial route.

Recommended First Step

- Draft a 400-word scope and send it to Invest NI or a bid advisor for fit review.
- Do not commit to full submission until the Createch fit is validated.
