

Autonomous Allocation And Eye-Scan Action Plan

Company: R&A CONSULTING AND BROKERAGE SERVICES LTD (NI696693)

Period: 2024-05-01 to 2025-04-30

Every item below remains visible, but Aureon applies a conservative working treatment from available data. The user role is eye-scan exception flagging plus legal approval/upload/submission/payment only; secrets or newly uploaded raw data are the only true manual inputs.

Domain	Status	Risk	Question	Required action
balance_sheet	system_allocated_eye_scan	critical	Do closing bank balances agree to statement balances?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Tie every bank/payment account to period-end statement balances.
balance_sheet	system_allocated_eye_scan	critical	Is the director loan account reconciled?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Reconcile director loan opening balance, movements, approvals, repayments, and year-end balance.
cognitive_challenge	system_allocated_eye_scan	critical	What would HMRC challenge first?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Autonomously allocate and flag high-risk tax/evidence questions before manual CT600 submission.
cognitive_challenge	system_allocated_eye_scan	critical	What must the human physically do after Aureon finishes?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Open START_HERE, eye-scan PDFs 21/22/23, sign/approve, then manually file/pay through official or commercial software.
cognitive_challenge	system_allocated_eye_scan	critical	Which assumption would change tax due?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Create tax-eye-scan sign-off for assumptions before manual filing.
cognitive_challenge	system_allocated_eye_scan	critical	What makes this unsafe to call final-ready?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Keep status as final-ready manual-upload support with autonomous allocations and eye-scan flags visible.
company_identity	system_allocated_eye_scan	critical	Which accounts, CT600, Corporation Tax payment, and confirmation statement deadlines are due or late?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Check Companies House and HMRC deadlines before manual submission or payment.
company_identity	needs_secret_manual_input	critical	Are Companies House authentication code, UTR, VAT, PAYE, and Gateway credentials kept manual and secret?	Human enters authentication codes and gateway credentials manually at filing time.
data_scope	system_allocated_eye_scan	critical	Did the company have cash sales, petty cash, or cash withdrawals?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan cash sales and complete petty-cash allocation for withdrawals.
document_pack	system_allocated_eye_scan	critical	Does the HMRC computation show workings, add-backs, deductions, and CT600 support?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan computation workings before manual CT600 entry.

Domain	Status	Risk	Question	Required action
expenses	system_allocated_eye_scan	critical	Which expenses may be disallowable for Corporation Tax?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan disallowables and add-backs before manual CT600 submission.
expenses	system_allocated_eye_scan	critical	Are payroll, subcontractor, and worker payments treated correctly?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan employees, directors, subcontractors, CIS statements, payroll RTI, and invoices.
revenue	system_allocated_eye_scan	critical	Which sales are taxable, exempt, outside scope, or non-trading receipts?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Classify income source types and VAT treatment before relying on VAT decisions.
tax_ct600	system_allocated_eye_scan	critical	Can I bridge accounts profit to taxable profit?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Finalise add-backs, deductions, disallowables, reliefs, and capital allowances.
tax_ct600	system_allocated_eye_scan	critical	Is the Corporation Tax rate correct for profit level and associated companies?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan associated companies and applicable rate before manual filing.
transaction_truth	system_allocated_eye_scan	critical	Are director, owner, personal, and related-party payments isolated?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Allocate each item to director loan, payroll/dividend, business expense, or evidence request.
vat_paye_cis	system_allocated_eye_scan	critical	Did the company run payroll, director salary, benefits, expenses, P11D, or RTI?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Ask for payroll reports, FPS/EPS submissions, PAYE reference, P11D/P11D(b), and payslips.
balance_sheet	system_allocated_eye_scan	high	Are accruals and prepayments needed?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan subscriptions, insurance, rent, professional fees, and post-period invoices.
balance_sheet	system_allocated_eye_scan	high	Are trade debtors and creditors recognised at period end?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Add aged debtors/creditors or eye-scan none existed.
balance_sheet	system_allocated_eye_scan	high	Does the fixed-asset register exist and match capital items?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Create or eye-scan fixed-asset register from capital/equipment rows.
cognitive_challenge	system_allocated_eye_scan	high	What would Companies House reject or require correction for?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Verify filing route, register details, signatures, and manual upload fields.
cognitive_challenge	system_allocated_eye_scan	high	Do Soup, Auris, validator, ledger, tax, evidence, and UK brain agree?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan disagreements, validator fails, and autonomous allocation rows before filing.

Domain	Status	Risk	Question	Required action
company_identity	system_allocated_eye_scan	medium	Which Companies House accounts route and statements need director approval?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan accounts route, approve/sign manually, and file manually through Companies House or approved software.
company_identity	system_allocated_eye_scan	medium	Are officers, PSCs, shareholders, SIC, registered office, and lawful-purpose details confirmed?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Ask the director to verify register details, then file/pay manually if needed.
company_identity	system_allocated_eye_scan	high	Are directors, officers, PSCs, shareholders, and SIC codes confirmed?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan officers, PSCs, shareholders, share capital, SIC codes, and lawful-purpose statement.
company_identity	system_allocated_eye_scan	high	Is the registered office current at Companies House?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Verify registered office manually against Companies House before filing.
company_identity	system_allocated_eye_scan	high	Is share capital confirmed and reconciled to reserves?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan share capital, dividends, prior reserves, and any share movements.
data_scope	system_allocated_eye_scan	medium	Have I ingested every bank, sales, cash, card, and payment account for the period?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Aureon flags for eye-scan no source is missing, then reconcile any new source through combined_bank_data.
data_scope	system_allocated_eye_scan	high	Do statements include opening and closing balances for each account?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Check every statement/export for full period coverage and no date gaps.
data_scope	system_allocated_eye_scan	high	Should PayPal, Stripe, marketplace, cash-register, or card-platform exports exist?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Aureon flags for eye-scan every sales/payment platform and add exports where used.
expenses	system_allocated_eye_scan	high	Do travel, motor, fuel, meals, or subsistence items have business-purpose evidence?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Attach mileage logs, job purpose, receipts, and private-use review.
expenses	system_allocated_eye_scan	medium	Which transactions need receipts, invoices, petty-cash vouchers, or allocation memos?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Use uploaded receipts/invoices/sales reports, generate internal allocation memos, and keep unsupported amounts in suspense/director loan/private drawings.
revenue	system_allocated_eye_scan	medium	Were bad debts, unpaid invoices, or credit notes considered?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Ask for invoice ledger, aged debtors, credit notes, and write-off approvals.
revenue	system_allocated_eye_scan	medium	Is any income deferred, accrued, or received in advance?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan contracts, invoices, delivery dates, and period cut-off.

Domain	Status	Risk	Question	Required action
revenue	system_allocated_eye_scan	high	Are grants, loans, capital introductions, or director funds excluded from turnover?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Eye-scan positive rows for loan/capital/grant/refund indicators.
tax_ct600	needs_secret_manual_input	medium	Do I have the company UTR needed for the CT600 workflow?	Request UTR from the human or secure env/secret store before manual CT600 filing preparation.
tax_ct600	system_allocated_eye_scan	medium	Have capital allowances, losses, reliefs, add-backs, director loan, VAT/CIS, and loan relationships been reviewed?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Reconcile judgement areas to receipts, invoices, board records, and tax workpapers before manual filing.
tax_ct600	system_allocated_eye_scan	high	Are prior losses, group relief, R&D, creative, or other reliefs available?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Add prior computations, loss schedules, relief evidence, or eye-scan none.
transaction_truth	system_allocated_eye_scan	medium	What changed since the last accounts run?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Compare current manifests with previous company_compliance/Desktop outputs before filing.
transaction_truth	system_allocated_eye_scan	medium	Are refunds, chargebacks, reversals, and contra entries identified?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Tie refund/chargeback rows to sales reports, original invoices, or platform statements.
transaction_truth	system_allocated_eye_scan	high	Are inter-account transfers excluded from taxable income/expenses where appropriate?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Reconcile transfer pairs across SumUp, Zempier, Revolut, and clearing accounts.
transaction_truth	system_allocated_eye_scan	high	Which rows have missing, vague, or low-confidence descriptions?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Autonomously allocate low-confidence rows to conservative suspense accounts, then flag visible exceptions.
vat_paye_cis	system_allocated_eye_scan	medium	Did the company have payroll, benefits, CIS construction activity, or VAT reverse-charge transactions?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Search descriptions/evidence for payroll, wages, CIS, subcontractor, contractor, VAT, and reverse-charge signals; flag for eye-scan where unclear.
vat_paye_cis	system_allocated_eye_scan	high	Does the company already have a VAT number or VAT registration history?	System allocation is already applied. Eye-scan only; flag this item if uploaded source data visibly contradicts the assumption. Original internal route: Enter VAT number/effective date/MTD route manually if applicable; Aureon only prepares VAT workpapers.

Manual Safety Boundary

- Companies House filing remains manual.
- HMRC CT600/iXBRL submission remains manual.

- VAT/PAYE/CIS registrations and returns remain manual.
- Tax, penalty, bank, or exchange payments remain manual.
- Generated internal allocation memos and eye-scan flags are not external supplier receipts.
