

Aureon Future Leaders Fellowship Round 11 Draft Pack

Prepared for Gary Anthony Leckey / R&A Consulting and Brokerage Services Ltd / Aureon Institute

Generated 2026-07-09. Draft pack only: convert to portal fields after eligibility and cost rules are confirmed.

Application ID	APP-IFS-FLF-R11-2499-20260709
Opportunity	IFS-FLF-R11-2499
Draft title	Aureon Evidence OS for AI-Driven Scientific Discovery and Auditable SME Automation
Draft amount	GBP 1,500,000 planning estimate, not final ask
Deadline tracker	2026-11-04T11:00:00+00:00
Email	gaxlec@gmail.com

Grant-Safe Positioning

A business/non-academic future-leader route for building a local-first evidence operating system that turns Gary Leckey's AI, scientific-discovery, and workflow-automation corpus into validated, reproducible tools for high-risk research and SME operations.

Use funder-safe wording: evidence operating system, auditable AI workflows, reproducible research tooling, validation sprint, workflow assurance. Treat unvalidated research claims as hypotheses, authored outputs, or validation targets until independent evidence supports more.

Work Packages

WP1 - Evidence OS core

Auditable local-first workflow runtime, evidence ledger, and grant-ready claim controls.

WP2 - Scientific discovery compute

HNC/PEFC/EPAS hypothesis workflows converted into reproducible compute tasks, benchmarks, and falsification protocols.

WP3 - SME automation pilots

Compliance, warehouse, and back-office workflows converted into measurable automation pilots with human review gates.

WP4 - External validation sprint

Partner review, academic challenge sessions, evidence-quality scoring, and public dissemination pack.

WP5 - Commercialisation and governance

Product roadmap, responsible AI controls, data protection pack, IP review, and partner/customer pipeline.

Evidence Base

Evidence category	Count
source_code_or_docs	49373
general_evidence	6353
research_paper	2945
sensitive_finance	1159
repo_or_pack_archive	303
grant_pack	94
profile_public_metrics	21

Corpus JSON: C:\Users\user\Aureon-trading\data\research\grants\AUREON_UNIFIED_WORK_CORPUS_20260709.json
Corpus digest: C:\Users\user\Aureon-trading\data\research\grants\AUREON_UNIFIED_WORK_CORPUS_20260709.md

Submission Gates

- Confirm FLF business/non-academic eligibility and host/organisation requirements in portal guidance.
- Build a costed four-year fellowship budget from salary, research staff, compute, equipment, travel, dissemination, and overhead rules.
- Verify public profiles before quoting counts: ResearchGate, ORCID, Academia.edu, GitHub.
- Resolve or manage Companies House confirmation statement risk before final submission.
- Attach only sanitized repo/evidence archives; exclude private finance unless exact use is approved.

Next Operator Action

Open the official FLF Round 11 IFS page, confirm eligibility and exact assessment questions, then convert this pack into portal-ready question responses and attachments.
